	Quality Policy	pag. 1 di 1

The **OMBAR S.r.l.** was founded in 1986 under the name MECBAR Snc by its founder Teodoro Bartolini.

OMBAR S.r.l., to guarantee the quality of its processes, has established a Quality Management System according to ISO 9001: 2015 concerning the following field of application: "**Precision mechanical processing for third parties**".

The quality management system implemented does not apply point 8.3 related to the design phase as it works on a design provided by the customer and point 8.5.5. relating to post-sales activities.

The constant development in technology and know-how has radically changed our production, increasingly specialized in the construction of EQUIPMENT and precision mechanics PARTICULARS for any Production and Assembly, in fact our reference product sectors range from the Automotive (Pneumatic - Leverage - Fabrics) , Razors and Cutting Blades, Industrial Air Conditioners and Heat Exchangers, Electric Motors, Hinges and Accessories for Furniture, Robotics, Food Packaging, Presses, Material Testing Machines, and others.

We boast a 600 square meter production facility. of shed and 150sqm of Offices arranged on two floors with an outdoor area of 600sqm . Our staff is divided by departments, exchanging information and concepts, collaborating in a common project: Customer Loyalty.

The company has decided to translate the adopted quality policy into the following objectives:

1. Full Customer Satisfaction;
2. Continuous improvement of its Quality Management System ISO 9001;
3. Achieving good company profitability;
4. Careful analysis of recorded non-conformities to identify appropriate corrective actions;
5. Compliance with all mandatory legal requirements applicable or requested by the customer;

OMBAR S.r.l. also undertakes to monitor the activities that influence the quality of the service, collect, analyze and review the data that allow defining and implementing appropriate actions aimed at improving and maintaining the suitability of the quality system.

OMBAR S.r.l., through a careful analysis of its processes and the "risks" connected to them and the application of ISO 9001: 2015, aims at identifying all the improvement actions (opportunities) to enhance its management control system.
